EDUCATION

National University of Sciences and Technology (NUST), SEECS

Expected Oct 2028

Bachelor of Science in Artificial Intelligence

CGPA: 3.7 | GPA-Based Scholarship (3.8 SGPA, Semester 2)

Relevant Coursework: Machine Learning, Programming for AI, Linear Algebra, Multivariable Calculus, Discrete Mathematics, Data Structures and Algorithms, Database Management System

EXPERIENCE

Backend Developer Intern | CSN Lab, NUST SEECS

Summer 2025

- Contributed to backend development of the NUST Support System, a full-scale complaint management platform
- Designed relational database schemas and implemented RESTful APIs using Node.js
- Implemented role-based access control (RBAC) for multi-role dashboard management
- Designed proximity-based worker assignment logic and performance tracking system

PROJECTS

SmartPulse – AI SaaS Platform

- Built a production-grade multi-tenant AI SaaS platform with a 5-model ML engine covering forecasting, churn prediction, anomaly detection, and clustering with auto model selection
- Implemented a reinforcement feedback loop; served via FastAPI microservices containerized with Docker.
- Delivered through a live React dashboard backed by MongoDB and Express

Multilingual Review Intelligence System

- Developed a multilingual star-rating prediction system using a stacking ensemble of TF-IDF + Logistic Regression and XLM-RoBERTa with confidence-based model routing across languages, product categories, and text quality
- Built a FastAPI inference service with full input validation and comprehensive test coverage including Locust-based stress testing

NUST Support System

- Designed backend architecture with role-based dashboards, complaint lifecycle workflow, and proximity-based worker assignment logic
- Built performance tracking system and integrated with frontend via RESTful APIs

VoteSecure

- Designed a blockchain-based voting system with eligibility verification logic, ensuring transparency while preserving voter privacy

NIMUN26 Conference Website

- Developed online registration infrastructure and admin portal; integrated Cloudinary for media management and automated email communication workflows

TECHNICAL SKILLS

Languages: Python, C++, Java, TypeScript, JavaScript

Frameworks & Libraries: FastAPI, PyTorch, Scikit-learn, XLM-RoBERTa, Next.js, React, Node.js

Databases: MySQL, MongoDB, Firebase, Supabase

Tools & DevOps: Docker, Kubernetes, Git, GitHub, CI/CD, Postman, Vercel, VS Code

Core Areas: Machine Learning, NLP, MLOps, Backend Development, Full-Stack Web

LEADERSHIP & ACTIVITIES

- Director Admin Coordination – NGDC
- Executive Web & IT – NUST Orientation 2025
- Deputy Director Web & IT – NIMUN26
- Director Finance – SEECS Welcome Event
