

Bob Nguyen

bob.nguyen87@email.com | (312) 555-0198 | Chicago, IL

Summary

Full-stack developer with 2 years of professional experience, primarily working in Django on internal business applications. Comfortable with SQL databases and Git workflows; still building depth in automated testing and cloud deployment.

Experience

Junior Software Developer — Prairie Systems Inc. (Jun 2023 – Present)

- Built and maintained internal Django applications for inventory tracking, using MySQL as the primary datastore.
- Wrote basic unit tests for new features, though test coverage across the codebase remains inconsistent.
- Used Git for version control with a small team; deployments are currently manual via SSH rather than an automated pipeline.
- Fixed bugs and implemented small features in a legacy PHP billing system.

IT Support / Junior Developer (part-time) — Chicago Community College (Sep 2022 – May 2023)

- Assisted faculty with basic Python scripting for grading automation.
- Provided general desktop and network support to staff.

Education

B.S. Information Technology, DePaul University, 2023

Skills

Python, Django, MySQL, PHP (legacy), Git, HTML/CSS, JavaScript (basic), Linux command line
