Summary

Frontend-focused software engineer with 6 years of experience building React applications and Java backend services for enterprise clients. Looking to grow into more backend-heavy roles.

Experience

Senior Frontend Engineer — Cascade Retail Group (Jan 2021 – Present)

- Led development of a React/TypeScript storefront serving 500K monthly users.
- Collaborated with a Java/Spring Boot backend team to integrate REST endpoints, though did not write backend code directly.
- Owned the component design system and accessibility standards for the frontend org.
- Used Jenkins-based CI/CD pipelines maintained by a separate platform team.

Software Engineer — Ferro Systems (Aug 2018 – Dec 2020)

- Built enterprise Java applications with Spring and Oracle SQL for supply-chain clients.
- Wrote SQL stored procedures and reports; minimal exposure to Python or FastAPI/Django.
- Participated in Agile ceremonies and sprint planning for a 12-person engineering team.

Education

B.S. Computer Engineering, University of Washington, 2018

Skills

JavaScript, TypeScript, React, Java, Spring Boot, Oracle SQL, Jenkins, Agile/Scrum, accessibility (WCAG), basic Python scripting
