SUMMARY

Backend engineer with 10+ years building high-throughput Python services and LLM-powered data pipelines for fintech and SaaS products.

EXPERIENCE

Senior Backend Engineer - Nexora Systems

March 2022 - Present | Lahore, Pakistan

- Designed and shipped 40+ FastAPI microservices handling 12M requests/day, reducing p99 latency from 840ms to 190ms.
- Rebuilt the PostgreSQL access layer: authored partial and composite indexes, analysed EXPLAIN ANALYZE execution plans and rewrote 30 hot queries, cutting average query time by 71%.
- Built a production RAG pipeline over 2.4M internal documents using pgvector, LangChain and OpenAI embeddings, now serving the customer support product.
- Deployed all services to AWS using ECS Fargate, Lambda and API Gateway, and authored the Terraform modules for the entire staging environment.
- Assisted with the migration of three legacy services to a Kubernetes cluster managed by the platform team.
- Owned GitHub Actions CI/CD pipelines covering build, test and blue-green deploy.

Backend Engineer - Datawing Analytics

June 2019 - February 2022 | Lahore, Pakistan

- Built Django and FastAPI REST services for a B2B analytics product used by 400 enterprise clients.
- Implemented Celery and Redis task queues for nightly ETL jobs processing 90GB per night.
- Containerised the full stack with Docker and docker-compose.

Freelance Python Developer - Self-employed (Upwork)

January 2020 - December 2021 | Remote

- Delivered 14 Python automation and API projects for US and UK clients alongside full-time employment at Datawing Analytics.

Junior Developer - CodeHive

January 2018 - May 2019 | Islamabad, Pakistan

- Maintained Flask internal tools and wrote PostgreSQL migration scripts.

EDUCATION

BS Computer Science - FAST NUCES, 2017

SKILLS

Python, FastAPI, Django, Flask, PostgreSQL, pgvector, Redis, Celery, Docker, Kubernetes, AWS (ECS, Lambda, S3, RDS), Terraform, LangChain, OpenAI API, GitHub Actions, pytest, SQLAlchemy, Alembic

PROJECTS

- pgvector-rag-toolkit - open-source RAG retrieval library, 800+ GitHub stars.
- fastapi-ratelimit - Redis-backed rate limiter, 12k monthly downloads.
- Datawing ETL Framework - internal Celery orchestration framework.
