Summary

Backend engineer with 7 years of experience building payment and ledger systems for fintech companies. Deep hands-on experience with Python, AWS, and microservices at scale. AWS Certified Solutions Architect.

Skills

Python, FastAPI, Django, PostgreSQL, AWS (Lambda, EC2, RDS, S3, IAM), Docker, Kubernetes, Kafka, GitHub Actions, Terraform, PCI-DSS compliance

Experience

Senior Backend Engineer — Fintech company: PayStream Inc.
(2021–Present)

- Led migration of a monolithic payments service into 12 independently deployable microservices on AWS EKS, reducing deployment time by 70%
- Designed transaction reconciliation pipeline using Kafka and FastAPI, processing 2M+ transactions/day with 99.99% uptime

- Owned PCI-DSS compliance requirements for the payments team; passed two consecutive external audits
- Mentored 3 mid-level engineers and ran architecture review sessions

Backend Engineer — Banking company: Alto Financial (2019–2021)

- Built REST APIs in Django for account management and KYC workflows
- Migrated relational schema to PostgreSQL, improving query performance by 40% via indexing and query optimization
- Set up CI/CD pipelines using GitHub Actions and Docker

Software Engineer — Junior role: BrightApp Labs (2018–2019)

- Built internal tooling in Python; first exposure to AWS (EC2, S3)

Education

B.Sc. Computer Science — University of Toronto (2018)

Certifications

AWS Certified Solutions Architect – Associate (2022)
