

Meera Iyer

Backend Software Engineer | | +1 (555) 812-4470
LinkedIn: [linkedin.com/in/meeraiyer](https://www.linkedin.com/in/meeraiyer)

Summary

Backend engineer with 5 years of experience building APIs and services for e-commerce platforms. Strong Python/Django background and solid AWS experience, currently expanding into containerized deployments.

Skills

Python, Django, Flask, PostgreSQL, MySQL, AWS (EC2, S3, RDS), Docker, Git, Jenkins, REST API design

Experience

Backend Engineer — Retail company: CartWorks (2022–Present)

- Built and maintained REST APIs in Django serving the core product catalog and checkout services
- Migrated checkout service database from MySQL to PostgreSQL
- Introduced Docker for local development environments across the team
- Set up basic CI pipeline using Jenkins for automated testing

Backend Engineer — Logistics company: RouteFleet (2020–2022)

- Developed internal APIs for shipment tracking using Flask
- Deployed services on AWS EC2; used S3 for document storage
- Collaborated with frontend team to define API contracts

Junior Developer — Startup: QuickCart (2019–2020)

- Built internal admin tools in Python/Django
- First exposure to cloud infrastructure (AWS EC2, RDS)

Education

B.Sc. Computer Science — Arizona State University (2019)

Notes

- No direct Kubernetes experience; has used Docker Compose only
- No fintech/regulated industry experience
- Has not worked with Lambda or serverless architectures
