

Thomas Reyes

Software Engineer | | +1 (555) 340-7729 LinkedIn: linkedin.com/in/thomasreyes-swe

Summary

Software engineer with 6 years of overall experience, primarily in Java backend development, with the last 12 months focused on transitioning to Python. Comfortable with cloud platforms generally; most production experience is on Azure rather than AWS.

Skills

Java, Spring Boot, Python (1 yr production), SQL Server, PostgreSQL, Azure (App Service, Blob Storage), basic AWS (personal projects only), Docker (learning), Git

Experience

Backend Engineer — Insurance company: Meridian Insure (2023–Present)

- Contributing to a Python/FastAPI rewrite of a legacy Java claims processing service (joined project 12 months ago)
- Writing REST endpoints and unit tests under senior engineer guidance
- Some exposure to PostgreSQL query writing and schema review

Backend Engineer — Java stack: Meridian Insure (2020–2023)

- Built and maintained Java/Spring Boot microservices for policy administration
- Deployed services to Azure App Service; used Azure Blob Storage for document handling
- Participated in on-call rotation for production incidents

QA Engineer → Backend transition: Meridian Insure (2018–2020)

- Started as a QA engineer writing automated test suites in Java
- Transitioned into backend development after internal upskilling program

Education

B.Sc. Information Technology — University of Houston (2018)

Notes

- Completed a self-paced AWS fundamentals course in 2024 (no certification)
- No production Kubernetes experience
- No fintech-specific or PCI-DSS experience
