

Priya Nair

Senior Backend Developer | | +1 (555) 902-1183
LinkedIn: [linkedin.com/in/priyanair91](https://www.linkedin.com/in/priyanair91)

Summary

Motivated backend developer with 2 years of hands-on coding experience and 3 years in technical support, looking to grow into a senior backend role. Self-taught Python skills through online courses and personal projects.

Skills

Python (scripting), basic SQL, AWS S3 (basic), Postman, Excel/VBA, customer ticketing systems, HTML/CSS (basic)

Experience

Senior Backend Developer — Small startup: DataPing Solutions (2024–Present)

- Self-appointed title; team of 2 engineers total, no formal hierarchy
- Wrote Python scripts to automate internal reporting tasks
- Built a small internal dashboard using Flask (no production traffic)
- Used AWS S3 to store CSV exports; no experience with EC2, Lambda, or RDS

Technical Support Engineer — SaaS company: HelpDeskPro (2021–

2024)

- Resolved customer tickets related to product configuration
- Wrote occasional Python scripts to parse log files for debugging
- No formal software development responsibilities

Intern — Marketing analytics: BrightAds (2020–2021)

- Built Excel/VBA macros for campaign reporting

Education

B.A. Business Administration — Kent State University (2020)

Completed: "Python for Everybody" (Coursera), "AWS Cloud Practitioner Essentials" (self-study, not certified)

Notes

- No experience with Django, FastAPI, Flask in production
- No Docker, Kubernetes, or CI/CD experience
- No microservices or database optimization experience
