

# Jordan A. Whitfield

Senior Data Engineer

jordan.whitfield@example.com | (555) 214-7788 | Austin, TX | linkedin.com/in/jordanwhitfield

## PROFESSIONAL SUMMARY

- Data engineer with 8+ years building large-scale ETL pipelines, streaming systems, and analytics platforms. Specializes in Python, Spark, and cloud-native data architecture on AWS and GCP. Proven track record leading cross-functional teams and cutting pipeline latency by over 60%.

## EXPERIENCE

### Staff Data Engineer — Meridian Analytics

Austin, TX | Mar 2021 - Present

- Redesigned the core ingestion pipeline using Spark Structured Streaming, reducing end-to-end latency from 4 hours to 22 minutes.
- Led a team of 5 engineers building a self-serve data platform used by 40+ analysts across the company.
- Migrated legacy batch jobs to Airflow-orchestrated DAGs on GCP, cutting infra cost by 35%.

### Data Engineer — Northbridge Retail Co.

Chicago, IL | Jun 2017 - Feb 2021

- Built inventory forecasting pipelines processing 2TB+ of daily transactional data.
- Implemented CI/CD for data pipelines using GitHub Actions and dbt, reducing deploy time by 70%.
- Partnered with product teams to design a real-time recommendation feature store.

## EDUCATION

B.S. Computer Science — University of Illinois at Urbana-Champaign

Graduated May 2017

## SKILLS

- Python, SQL, Apache Spark, Kafka, Airflow, dbt, AWS (S3, Redshift, EMR), GCP (BigQuery, Dataflow), Docker, Kubernetes, Terraform.
